

# SEPP Undergraduate Student Learning Outcomes

*“Assessment is a rich conversation about student learning informed by evidence.”*

## **BSU secondary education students will be able to...**

- Analyze the complex and conflicting contexts of public education in order to empathize with multiple perspectives and develop informed points of view.
- Develop a personal teaching philosophy grounded in known theories of teaching and learning and their classroom experiences.
- Design learning environments and experiences that include, represent, and engage all learners through effective planning, instruction, and assessment.
- Reflect on the pedagogy of self and others and its impact on learners in order to continually adapt their practice.
- Commit to act as social justice allies and leaders in their classrooms, schools, and communities.
